

TRANSCENTIVE EXPRESS DESKTOP™ APPLICATION

FACT SHEET

Challenge: Easily providing plan participants secure, online access to their personal employee stock option and/or stock purchase plan account information.

Solution: Transcentive's Express Desktop™ application.

Personal stock portfolios right at participants' fingertips.

Now you can bring your employee stock option and stock purchase plans directly to the desk of your plan participants. Transcentive's Express Desktop™ application provides participants with real-time, self-service access to their personal stock plan portfolios via the Internet and/or corporate intranet.

SECURE DESKTOP ACCESS

The Express Desktop application provides participants with secure access to all of their plan information in real time. With the click of a mouse, participants can:

- > Obtain access to their personal portfolios in a secure environment
- > View all personal stock plan data, including grants, exercises, contributions, dispositions, and vesting schedules
- > View tax and basis information for prior transactions and option/stock grants
- > Analyze the value of their portfolio with modeling capabilities at different share prices showing potential gain as well as all costs and taxes associated with the transaction
- > Review plan documents, frequently asked questions (FAQs) and download forms from a corporate online library

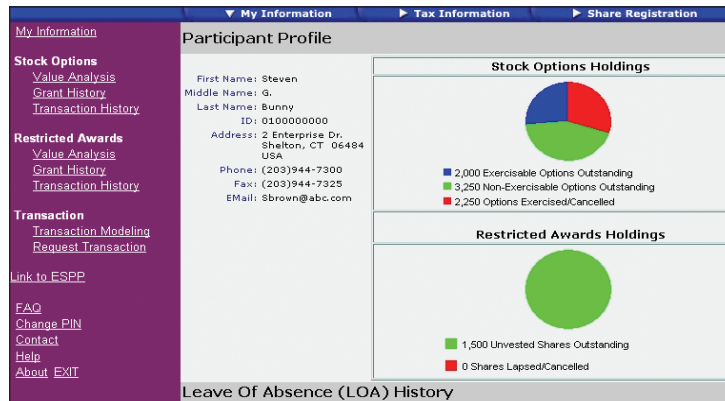

In addition to standard functionality, online grant delivery, restricted stock tax elections, acceptance capabilities, and employee stock purchase plan enrollment functionality can easily be added for additional convenience and efficiency.

BENEFITS

The Express Desktop application works to streamline communications with your plan participants, reducing the day-to-day inquiries you receive. By allowing your participants to perform a variety of functions from their own desktops, you are able to focus on other critical tasks.

The application utilizes the latest Web technologies and works in conjunction with Transcentive's Express Options™ and/or Express Stock Purchase™ software solutions. There is no need to install any additional software on your participants' computers - all they need is a standard Web browser. The application can also be customized for your organization with your company logo, FAQ's specific to your plans, and your plan documents.

Real-time plan participant access

> THE RIGHT SOLUTION

Transcentive's 30 years of experience, combined with feedback from thousands of clients, positions us to provide not only the best software in the industry but also a full line of advisory solutions.

Our customized approach will help you maximize efficiency and effectiveness, while helping you mitigate the risk associated with your plan process and administration tools.

So tell us your administration challenge and we'll find a solution that is right for you.

In addition the application:

- > Improves employee motivation and boost morale through greater understanding of equity plans and recognized value
- > Reinforces to participants that they are a shareholder, further aligning them with the goals of the corporation
- > Reduces the administrative burden and costs of communication with self-service access
- > Strengthens and increases utilization of all employee Web self-service sites with a consistent delivery method with other Web-based benefit tools such as 401(k) and health benefits
